

1500 PWC JET SKI LIFT

IMM QUALITY
— BOAT LIFTS —

1500 PWC Jet Ski Lift

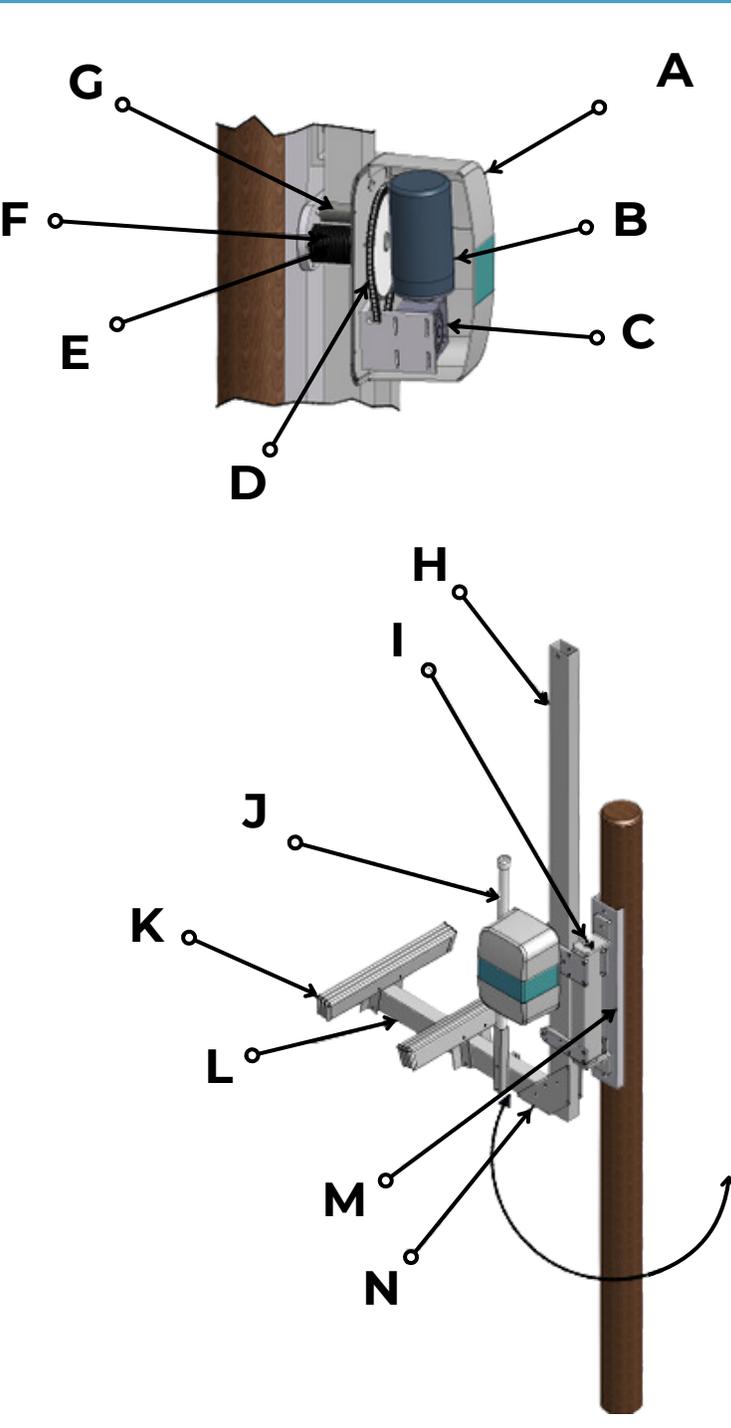

The 1500 PWC jet ski lifts by IMM Quality Boat Lifts are chain-driven, single pile-mounted lifts. Considered the best PWC jetski lifts, these are specifically engineered for personal watercrafts such as jet skis or kayaks. For kayak applications, IMM Quality Boat Lifts manufactures a custom throughflow access platform. This will raise and lower with the lift.

When raised, all components of the 1500 PWC jetski lift remain out of the water, so there is no need for sacrificial zinc anodes. Available in Swivel or Stationary models, the 1500 PWC jet ski lift for sale can accommodate most any personal watercraft application.

FEATURES AND OPTIONS

1500 PWC Jet Ski Lift Standard Features

- 
- The diagram illustrates the components of a 1500 PWC Jet Ski Lift. The top section shows a cross-section of the motor and gearbox assembly, with labels A through G. The bottom section shows the carriage arm assembly mounted on a vertical post, with labels H through N. The labels point to various parts including the cover, motor, gearbox, chain, cable winder, cables, roller guides, aluminum construction, mounting bracket, guide post base, aluminum bunks, rectangular tube construction, and gusset plates.
- A** Heavy duty rotomolded cover protects mechanical and electrical components from the elements.
 - B** Continuous duty high service factor electrical motor.
 - C** Sealed maintenance free worm gearbox with tapered roller bearings.
 - D** Heavy duty chain supplies high shock load capability. A positive drive transmission, therefore no belt slippage as seen on inferior flat plate drives
 - E** Grooved nylon cable winder allows for even cable winding with quiet operation and greater durability.
 - F** Stainless steel aircraft cables.
 - G** Nylon roller tube guides allow for smooth operation of the carriage.
 - H** Marine grade 6061-T6 corrosion resistant aluminum and stainless steel construction.
 - I** Mounting bracket allows the carriage arm to rotate 180 degrees to make changing the position of your PWC from over water to over dock easy. Pivot bearings are self-lubricating and maintenance free.
 - J** Heavy duty reinforced guide post base with pvc covered guide post which is easy to adjust.
 - K** Custom extruded aluminum bunks with UV resistant non-marring pvc caps.
 - L** Heavy duty rectangular tube construction provides superior strength and stiffness versus I-Beam designs. Simplified design provides sturdy support for the bunks.
 - M** Lifts come pre-assembled for easy installation, just thru-bolt to the pile.
 - N** Our carriage arms use heavy duty gusset plates in this critical joint area. These gussets have CNC machined grooves to provide structural support and ensure correct geometry of the carriage arms. Our joint is the strongest in the industry.

OPTIONS

- High-speed version is twice as fast. Also available with the Platinum drive.
- Our custom aluminum bunks, covered in white vinyl, are guaranteed not to float. They are covered by a 10-year warranty against tearing, fading, mold and corrosion
